

LIVO FOOTWEAR INDUSTRIES PVT. LTD.

OFFICIAL SOP RELEASE

Kathmandu & Biratnagar Factory Deployment • IRD PAN: 609823412

Document Ref: LIVO-SOP-2026-V2.4

STANDARD OPERATING PROCEDURE & TRAINING MANUAL

LIVO FOOTWEAR ERP FACTORY OPERATIONS MANUAL & CLIENT IMPLEMENTATION PLAYBOOK

A complete, plain-language visual operations guide for shop-floor data clerks, warehouse storekeepers, wholesale dispatchers, factory supervisors, and statutory auditors.

TARGET HARDWARE

Factory Terminals (1920×1080)
Shop-Floor Tablets (1280×800)
High-Speed Barcode Readers

STATUTORY AUTHORITY

Inland Revenue Dept (IRD) Nepal
Schedule-5 Tax Invoicing (अनुसूची-५)
13% VAT Exact Paisa Math

DEPLOYMENT DETAILS

Production Version: 2.4
Offline Architecture: IndexedDB
Effective Date: September 2026

Table of Contents

CHAPTER	TOPIC & CORE PROCEDURES	PRIMARY FACTORY PERSONA
Chapter 1	Getting Started & Computer Setup (Implementation Guide)	All Plant Staff & IT Technicians
Chapter 2	The Factory Screen Layout (Every Icon, Badge & Button Explained)	Shop-Floor Operators & Supervisors
Chapter 3	Production Batch Entry (How Ramesh Enters Finished Shoes Without a Mouse)	Ramesh (Shop-Floor Data Clerk)
Chapter 4	Stock Ledger & Sizing Matrix (How Sita Audits Physical Pairs on Racks)	Sita (Warehouse Storekeeper)
Chapter 5	Controlled Stock Corrections (Physical Counting Reconciliations & Spoilage)	Floor Supervisor & Sita
Chapter 6	Wholesale Dispatch & Nepal Tax Invoices (Carton Math & Schedule-5 Billing)	Sita (Dispatch & Billing Clerk)
Chapter 7	Party Accounts & Customer Aging (Managing Credit Limits & Cash Receipts)	Accountant & Credit Controller
Chapter 8	Auditor Read-Only Mode (How Hari Prasad Verifies Books & Exports Data)	Hari Prasad (Chartered Auditor)
Chapter 9	Supervisor Exception Cockpit & Factory Diagnostics (Live Floor Friction)	Floor Supervisors & IT Admins
Chapter 10	HR Management, Advance Ledger & Worker Payroll (50+ Staff, Overtime & Peshki)	Gita (HR Officer & Timekeeper)
Chapter 11	Product Media Gallery & Wholesale Line Sheets (Image Upload & Local Downloads)	Sita & Wholesale Sales Reps
Chapter 12	Production Ratio Analytics & Efficiency Graphs (Pairs/Worker Output & Trends)	Dambar Shrestha (Factory GM)
Chapter 13	Sales & Customer Leaderboards (Top-Selling Shoe Podiums & Top Clients)	Sales Director & Factory GM
Chapter 14	10-Second Quick Troubleshooting Guide (Cold Boots, Sync & Stock Errors)	All Shift Staff & Dispatchers

Factory Personas: "A Day on the Factory Floor"

To eliminate confusing technical jargon, all procedures in this manual are explained through the real-life tasks of dedicated employees at Livo Footwear Industries:

1. Ramesh — Shop-Floor Data Entry Clerk

LINE 1 & 2 ASSEMBLY PLANT

Environment & Habits: Works on a dusty, brightly lit assembly floor near the conveyor lines. Uses a standard keyboard with a dedicated numeric keypad. He hates using the mouse because picking it up slows down batch logging.

Daily Mission: Record 400 to 800 finished pairs per shift across Continental Paris Points (Sizes 32–43). He relies on **Tab**, **Enter**, and **Ctrl+Enter** to log batches in seconds, even if the plant Wi-Fi drops

momentarily.

2. Sita — Warehouse Storekeeper & Wholesale Dispatcher

FINISHED GOODS WAREHOUSE & LOADING DOCK

Environment & Habits: Meticulous, counts actual cardboard cartons on flatbed delivery trucks, inspects size ratios, and checks that every bill strictly complies with Nepal Inland Revenue Department (IRD) regulations.

Daily Mission: Dispatch master cartons to wholesale dealers in New Road and Narayangarh. She uses the 1 Carton = 12 Pairs carton calculator, confirms Buyer PAN numbers, and prints statutory Schedule-5 Tax Invoices.

3. Hari Prasad — Statutory Auditor & Tax Consultant

INTERNAL AUDIT & ACCOUNTS OFFICE

Environment & Habits: Skeptical, detail-oriented, checks balance arithmetic down to the exact paisa, ensures no staff member has altered historical records, and audits customer credit limits.

Daily Mission: Log in using the read-only viewer_demo profile to examine stock movements, inspect overdue accounts receivable (31–60d, 61–90d, >90d), verify dispute notes, and export CSV audit reports.

4. Gita — HR Officer & Shift Timekeeper

ADMINISTRATIVE DESK & TIMEKEEPER GATE

Environment & Habits: Tracks shift attendance across morning and night shifts, manages cash advance requests (पेशकी), and executes monthly payroll calculations without spreadsheet discrepancies.

Daily Mission: Maintain profiles for 50+ staff, issue cash advances with automatic real-time deduction, log monthly hours and \$1.5 times\$ overtime, and execute wage settlements.

5. Dambar Shrestha — Factory General Manager & Line Superintendent

PLANT EXECUTIVE OFFICE & FLOOR CATWALK

Environment & Habits: Evaluates output-per-worker ratios, diagnoses machine bottlenecks, and aligns production schedules with wholesale demand curves.

Daily Mission: Inspect daily dual-axis production efficiency charts across 1-month, 3-month, and 1-year horizons, monitor top-selling footwear podiums, and evaluate customer payment reliability.

Chapter 1: Getting Started & Computer Setup

This implementation chapter guides IT technicians and floor supervisors in setting up factory terminals and explaining the login boundary.

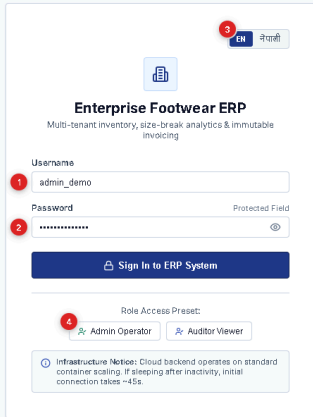

1.1 Hardware & Browser Requirements

- **Factory PC / Shop-Floor Monitor:** 1920×1080 resolution recommended. Works smoothly on older Core i3/i5 computers with 4GB RAM running Windows 10 or 11.
- **Shop-Floor Tablets:** 10-inch Android or iPad tablets (1280×800 minimum resolution) using Google Chrome.
- **Supported Browsers:** Google Chrome (Version 110+) or Microsoft Edge. Do not use Internet Explorer.
- **Barcode Scanners:** Standard USB or Bluetooth HID barcode scanners (emulating keyboard strokes with a trailing Enter).

1.2 Creating a Desktop One-Click Icon

1. Open Google Chrome and navigate to: <https://livo-footwear-erp.vercel.app>
2. Click the Chrome menu (⋮) at the top-right corner.
3. Select **Save and Share** → **Create Shortcut...**
4. Name the shortcut "**LIVO Footwear ERP**", check the box "*Open as window*", and click **Create**. An icon will appear on the desktop that opens like a clean native desktop application without address bars.

1.3 Logging In: The Authentication Gateway

SCREEN 01: Authentication Gateway (/login)

Callouts: [1] Username [2] Password [3] Show/Hide [4] EN/नेपाली [5] Demo Personas

CALLOUT	SCREEN ELEMENT	FACTORY PURPOSE	OPERATOR ACTION
1	Username Input	Identifies operator identity (e.g., admin_demo or viewer_demo).	Type operator ID or click Quick Persona.

CALLOUT	SCREEN ELEMENT	FACTORY PURPOSE	OPERATOR ACTION
2	Password Input	Secures terminal with encrypted argon2id/bcrypt token.	Type your password securely.
3	Show/Hide Password	Reveals hidden characters to prevent typo lockouts in noisy plants.	Click the Eye icon to view password in plain text.
4	Language Toggle (EN / नेपाली)	Switches between Pure Industrial English and Nepali Factory Vernacular.	Click नेपाली for local shop-floor terms or EN for English.
5	Quick Persona Buttons	One-click credential fill for training and testing drills.	Click Admin Operator or Auditor Viewer.

Language Rule: When **EN** is selected, 100% of labels and tables appear in standard English with zero Devnagari script. When **नेपाली** is selected, labels use authentic factory terms with bracketed technical terms (e.g., उत्पादन दाखिला (Production Entry), कर बिजक (Tax Invoice)) so that new staff can learn fast.

Chapter 2: The Factory Screen Layout

LIVO ERP utilizes an "Industrial Paper" visual design. The screen has a matte #F8FAFC off-white base with high-contrast #0F172A text and #CBD5E1 borders to eliminate eye strain under harsh fluorescent shop-floor lighting.

The screenshot displays the LIVO ERP Factory Dashboard. At the top, the header includes the LIVO GROUP logo, a user profile (ADMIN / SUPERVISOR), and a language toggle (English/Nepali). The dashboard is divided into several sections:

- FACTORY FLOOR VELOCITY:** Shows production and dispatch metrics for today. Produced today: 12 pps, Dispatched today: 0 pps. Net inventory data shows +12 pairs.
- REALIZED CASH RATIO:** Displays immediate cash (Rs. 0) and receivable due (Rs. 0). Gross invoiced today is Rs. 0.
- LINE EFFICIENCY & ORDERS:** Shows active workers (4 on line), yield per worker (3.0 pps), and 8 orders booked.
- PRODUCTION OUTPUT BY MODEL:** A bar chart showing pairs produced for model BOOT-BLK-42.
- PAIRS PRODUCED VS. DISPATCH CHIEF:** A bar chart comparing dispatched and produced pairs for factory volume.
- CASH REALIZATION RATIO:** A chart showing no sales booked today.
- TODAY'S FINISHED PRODUCTION BATCHES (1):** A table listing batch details for BATCH-0026, including target (12 pps), produced (12 pairs), workers (4), status (completed), and ledger impact (+12 IN).
- TODAY'S SALES BOOKINGS & DISPATCHES (0):** A section indicating no client sales orders recorded for this date.

Callouts identify key UI elements: [1] Top Banner, [2] Network Status, [3] Active Role, [4] Module Tabs, and [5] Language Toggle.

CALLOUT	SCREEN ELEMENT	WHAT IT TELLS THE WORKER	CLICK BEHAVIOR
1	Top Brand Banner	Shows legal facility name and registered IRD PAN (609823412).	Click to return to main dashboard.
2	Connection Status Badge	Online: Terminal connected to central cloud server. Offline (X Batches): Working locally in browser IndexedDB memory. Syncing: Flushing saved offline records to server.	Hover to see queue count; click to trigger manual sync check.
3	Role Indicator	Shows current user permissions (admin with write access vs. viewer read-only).	Displays active security boundary.
4	Primary Module Tabs	Allows switching between the 6 operational factory departments.	Click any tab to switch view instantly without full page reloads.
5	Header Language Switch	Persistent toggle between English and Nepali factory vernacular.	Remembers choice in browser memory.

2.1 The Connection Status Light Explained

In Nepali industrial zones (Biratnagar, Hetauda, Bhaktapur), factory Wi-Fi frequently drops. LIVO ERP includes an automatic local storage engine (IndexedDB). Staff never need to stop typing when the internet fails:

- **■ ONLINE (इन्टरनेट चालु छ)** : Everything saves directly to the central PostgreSQL database.
- **■ OFFLINE — X BATCHES STORED (अफलाइन)** : You can continue entering batches. Data is safely locked into the computer's hard drive storage. A yellow alert bar appears.
- **■ SYNCING OUTBOX (सिङ्क हुँदैछ)** : When Wi-Fi restores, the terminal automatically sends all pending batches to the server one by one without duplicate counting.

This chapter teaches **Ramesh** how to log hundreds of finished shoe pairs coming off the assembly lines at high speed without lifting his fingers from the keyboard.

SCREEN 03: Production Batch Terminal

CALLOUT	SCREEN ELEMENT	FACTORY PURPOSE & VALIDATION RULES	KEYBOARD SHORTCUT
1	Shoe Model Select	Choose model code (e.g., LIV0 Urban Runner, Classic Oxford).	Alt+M to focus dropdown
2	Line & Shift Config	Tags entry to specific conveyor line (Line 1/2) and shift crew (Shift 1/2/3).	Tab to cycle fields
3	Paris Points (Sizes 32–43)	12 individual input boxes representing Continental footwear sizing.	Tab / Enter to advance
4	Live Batch Review Strip	Instantly sums total pairs and compares with Shift Target Plan.	Calculates in real time
5	Commit & Save Batch	Applies immutable stock movement and creates sequential voucher.	Ctrl+Enter (Instant Submit)

3.1 The "No-Mouse" High-Speed Entry Drill

Follow this exact 5-step keystroke sequence to enter batches in under 10 seconds:

1. Select the Shoe Model and Production Line using  arrow keys.
2. Press  until the cursor jumps into the first size box: **Size 32**.
3. Type the pair count on the numeric keypad (e.g., 0 or 12), then press  or . The cursor instantly snaps to **Size 33**.
4. Continue typing counts across sizes 34, 35, 36, 37, 38, 39, 40, 41, 42, 43.

5. Press **Ctrl+Enter**. The system confirms: *"Batch saved successfully!"*, logs the voucher (e.g. BATCH-2026-0089), clears the quantity boxes, and automatically returns the cursor to **Size 32** for the next batch. **You never have to touch the mouse!**

Integer Pairs Only: Footwear manufacturing does not permit fractions or negative pairs. If Ramesh accidentally types 12.5 or -5, the input box flashes red and prevents submission until corrected to a whole positive number.

Chapter 4: Stock Ledger & Sizing Matrix (मौज्दात खाता)

This chapter teaches **Sita** how to inspect warehouse stock across the full Continental size curve and spot incomplete sets that wholesale buyers will reject.

SCREEN 04: Pinned Column Sizing Grid & Ledger

Callouts: [1] Pinned SKU [2] Article Name [3] Paris Points Curve (32-43) [4] Broken-Curve Alert [5] Total Pairs

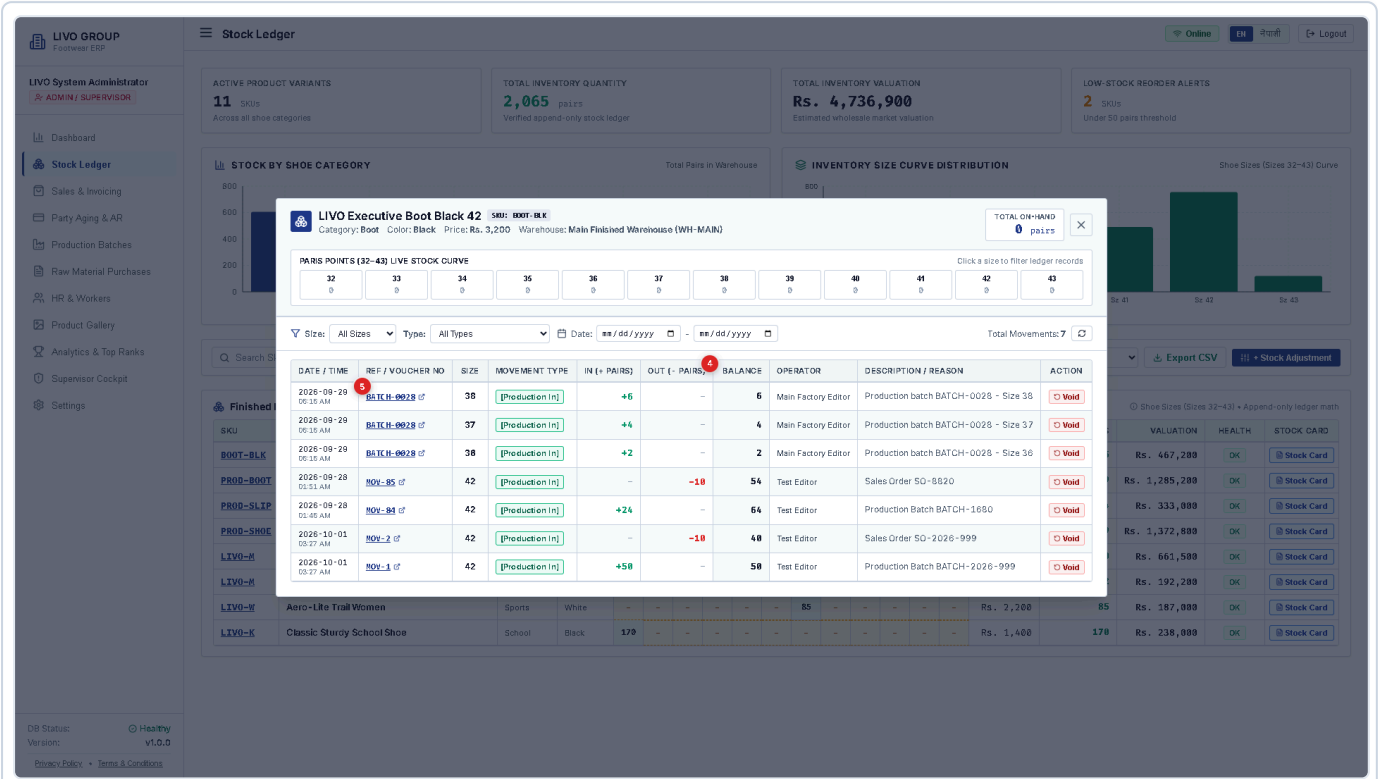

CALLOUT	SCREEN ELEMENT	HOW TO READ THE DATA	ACTION REQUIRED
1	Pinned SKU Column	Permanent unique item code (e.g., SKU-URB-BLK). Stays locked on left.	Searchable via top bar
2	Pinned Article Name	Model commercial name and colorway. Never scrolls off screen.	Click to open Stock Card
3	Horizontal Size Grid (32-43)	Bold Number: Exact pairs on warehouse shelves. Dash (—): Size not manufactured for this article. Red 0!: Completely out of stock in this size.	Verify physical rack counts against bold numbers.
4	Broken-Run Badge	[39-41 BROKEN] Core adult sizes missing. [COMPLETE SET] Full size curve available.	Warn wholesale buyers before packing delivery trucks.
5	Total Pairs Column	Sum of all sizes currently available in warehouse inventory.	Audited against physical warehouse ledger.

4.1 Understanding Broken Size Runs (टुटेका साइजहरू)

In wholesale footwear, shoe stores in Nepal buy shoes in full cartons containing an assortment of sizes (e.g., 1 pair of 38, 2 pairs of 39, 3 pairs of 40, 3 pairs of 41, 2 pairs of 42, 1 pair of 43). If a warehouse runs out of Sizes 39, 40, or 41 (the "Golden Sizes"), dealers will refuse the carton because customers cannot find their size. The red **[Broken]** indicator warns Sita not to promise orders until the assembly plant produces more core pairs.

The Stock Card (स्टक कार्ड) — Complete History of Every Shoe

When Sita or an auditor needs to know who added or removed shoes, clicking "Stock Card" opens an immutable transaction history showing every batch, every invoice, and every stock correction.

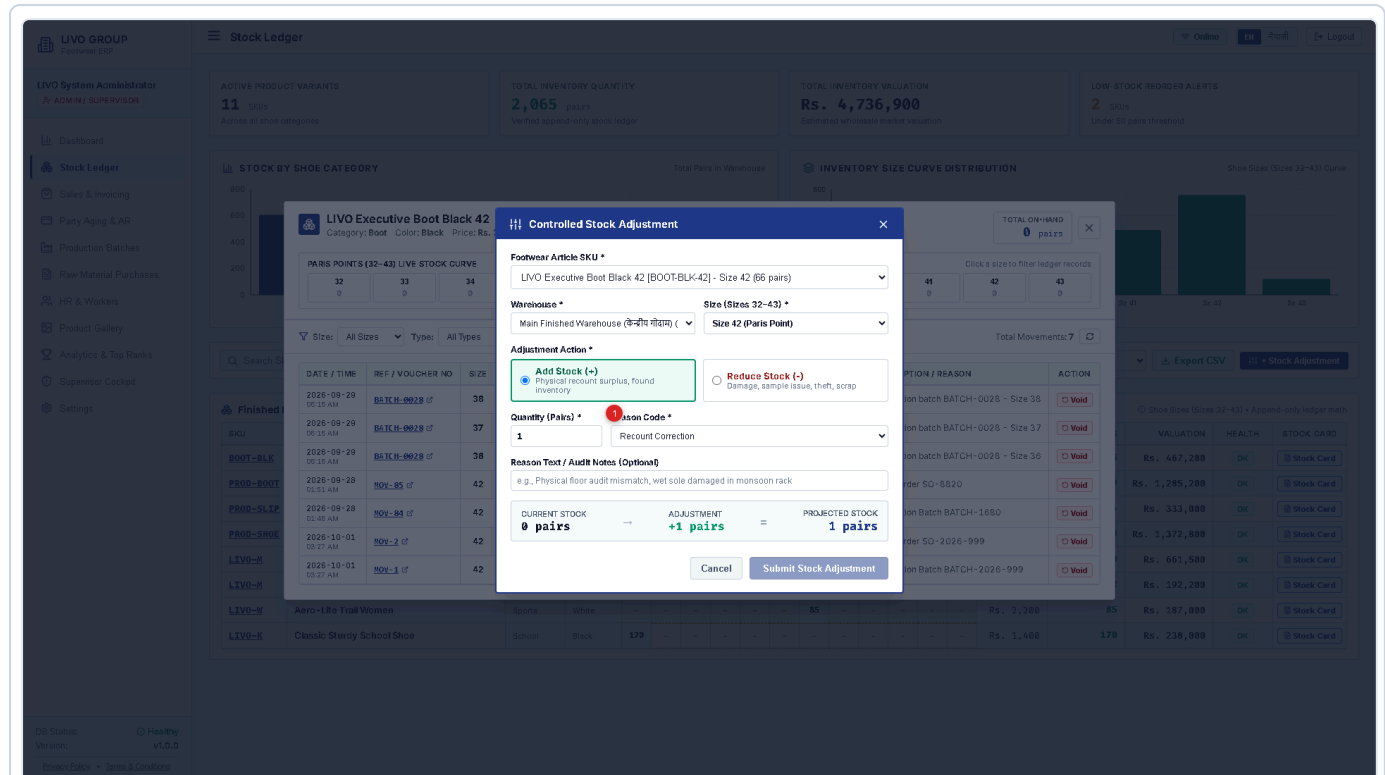

SCREEN 05: Stock Card Modal (स्टक कार्ड विवरण) Callouts: [1] Live Size Curve [2] Inflow (+) [3] Outflow (-) [4] Running Balance [5] Source Voucher Tag

CALLOUT	SCREEN ELEMENT	STATUTORY & FACTORY MEANING	AUDIT RULE
1	Live Size Curve Dock	Shows current shelf balance across all 12 Continental sizes in one glance.	Matches physical shelf racks
2	Inflow Column (+)	Shoes received into inventory from production batches or returns.	Positive ledger entry
3	Outflow Column (-)	Shoes dispatched to buyers via tax invoices or approved samples.	Negative ledger entry
4	Running Balance	Accumulated inventory balance after each movement occurred.	Zero-Floor Protected
5	Voucher Reference Tag	Clickable link to original source document (BATCH-XXXX or INV-01-XXXX).	Immutable audit trail

The Physical Registered Notebook Analogy: LIVO ERP functions like a physical legal notebook where lines can never be erased or whited-out. If someone made a mistake, they cannot delete the row; they must record an official adjustment or reversal line.

Chapter 5: Controlled Stock Corrections (स्टक मिलान)

This chapter explains how to correct counting mistakes, record broken shoes, or log marketing samples without compromising government tax audit trails.

SCREEN 06: Controlled Stock Adjustment Modal

Callouts: [1] Reason Code [2] Reason Options [3] Target Paris Point [4] Supervisor Token [5] Commit Adjustment

CALLOUT	SCREEN ELEMENT	FACTORY PURPOSE	RULES & CONSTRAINTS
1	Reason Code Selector	Statutory classification of why the physical count differed from system count.	Mandatory selection
2	Approved Reason Types	RECOUNT: Physical inventory count reconciliation. DAMAGED: Torn leather, failed sole bonding. SAMPLE: Taken by marketing for retail showroom. SCRAP: Beyond repair; sent to recycling.	Categorized in audit reports
3	Select Paris Point	Identifies the exact shoe size being adjusted (e.g. Size 41).	Adjusts individual size cell
4	Supervisor Authorization	High-security PIN or token required whenever stock is <i>reduced</i> .	Prevents unauthorized theft concealment
5	Commit Adjustment	Applies movement and logs supervisor name in audit trail.	Creates ADJ-XXXX voucher

Chapter 6: Wholesale Dispatch & Nepal Tax Invoices (कर बिजक)

This chapter guides **Sita** through creating wholesale dispatch orders, using the carton-to-pair calculator, calculating 13% Nepal VAT, and printing official Schedule-5 tax bills.

SCREEN 07: Wholesale Dispatch & Tax Callouts: [1] Buyer Name [2] Buyer PAN [3] Carton Helper (1 Ctn = 12 Prs) [4] 13% Invoice Form VAT Calculation [5] Grand Total

CALLOUT	SCREEN ELEMENT	STATUTORY MEANING (NEPAL IRD)	FACTORY VALIDATION
1	Buyer / Client Name	Registered wholesale dealer or institution purchasing footwear.	Select from approved debtors
2	Buyer PAN Number	Permanent Account Number (9 digits) issued by Inland Revenue Dept.	Mandatory for transactions > Rs. 10,000
3	Carton Packaging Helper	Dual-unit calculator: Cartons × 12 = Total Loose Pairs.	Ensures truck loading matches invoice
4	VAT (13%) Computation	Statutory 13% Value Added Tax calculated in integer paisa arithmetic.	Exact rounded currency math
5	Grand Total (NPR)	Total receivable amount including base subtotal and 13% VAT.	Appended to Party Aging ledger

The Carton Packaging Helper: Footwear master cartons contain exactly 12 pairs. If a customer orders 20 cartons, typing 20 in the Carton box automatically fills 240 pairs into the system. If loose pairs are also shipped, Sita can add loose pairs and the total updates instantly.

Official Nepal IRD Schedule-5 Printable Tax Invoice (अनुसूची-५ कर बिजक)

When goods leave the factory gate, trucks must carry the official printed tax invoice to pass traffic police and tax checkpoint inspections across highways.

Callouts: [1] Debtor Info [2] Net Balance [3] Debit (+) [4] Credit (-) [5] Running Balance [6] Audit/Dispute

Chapter 8: Auditor Read-Only Mode (निरीक्षण मोड)

This chapter explains how **Hari Prasad** conducts external audits without the risk of accidental data modification or tampering.

Initializing LIVO Industrial ERP...
Verifying session security credentials...

SCREEN 13: Auditor Read-Only Interface (/login via viewer_demo) Callouts: [1] Viewer Role Badge [2] Export CSV Available [3] Absence of Mutation Buttons

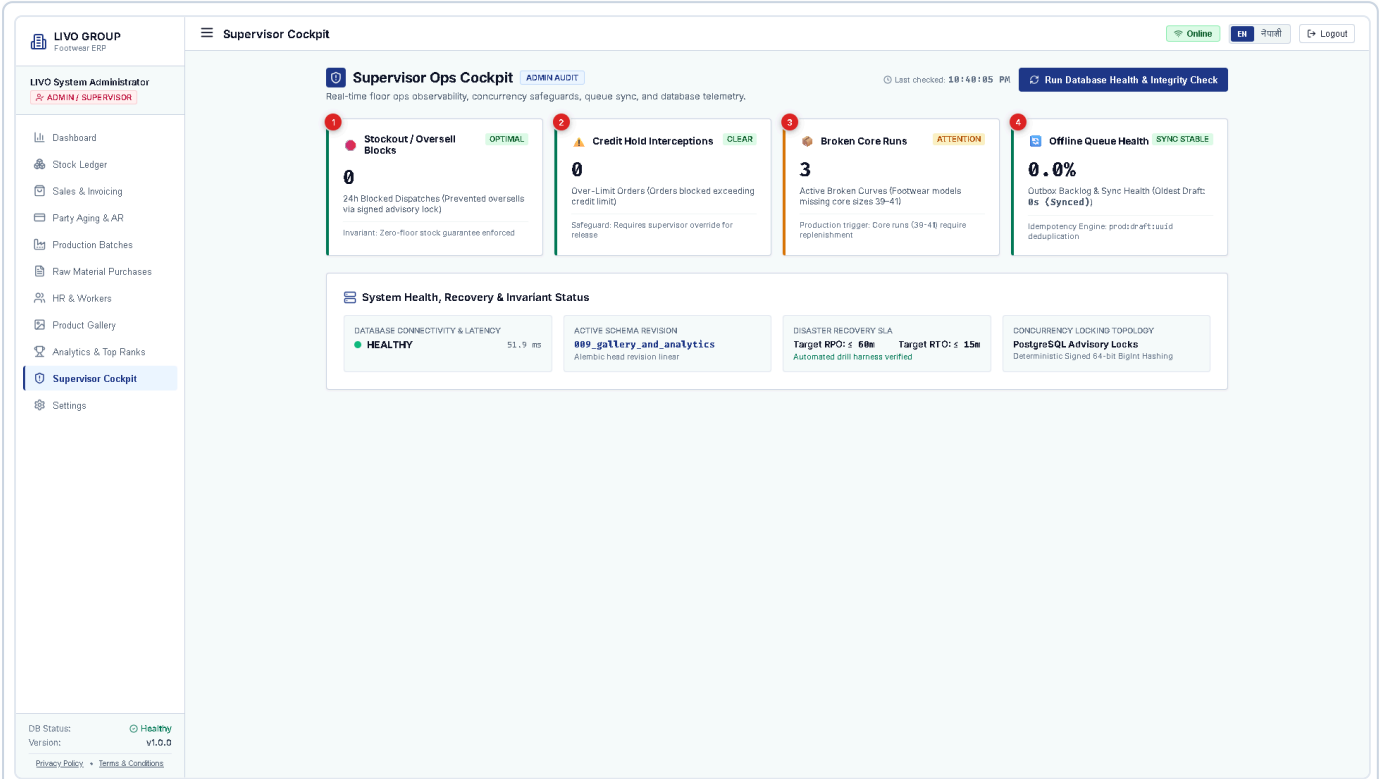

8.1 Tamper-Proof Safeguards

When logged in as `viewer_demo`, the ERP user interface automatically enforces read-only safety mechanisms:

- **All Mutation Buttons Vanish:** The buttons + New Batch, + Stock Adjustment, Commit Batch, and + Record Payment are completely removed from the DOM.
- **Keyboard Shortcut Guard:** Shortcuts like `Ctrl+Enter` are deactivated.
- **Backend API RBAC:** Even if a malicious user uses browser developer tools to send an HTTP POST request, the backend server rejects the mutation with an immediate 403 Forbidden: Insufficient operational privileges error.
- **CSV / Excel Export:** Auditors can export full raw ledger datasets via the **Export CSV** button for independent balance verification.

Chapter 9: Supervisor Exception Cockpit & Diagnostics

The Exception Cockpit is the floor superintendent's central nerve center for diagnosing friction across production lines and wholesale dispatch docks in real time.

SCREEN 11: Supervisor Exception Cockpit (/cockpit) Callouts: [1] Blocked Dispatches [2] Over-Limit Orders [3] Broken Core Runs [4] Outbox Backlog

CALLOUT	TELEMETRY METRIC	OPERATIONAL THRESHOLD	REQUIRED INTERVENTION
[1]	Blocked Dispatches	Count > 0 halts wholesale loading	Check underlying root cause: credit limit freeze or insufficient shelf inventory.
[2]	Over-Limit Orders	Balance exceeds credit ceiling	Obtain finance supervisor token or collect bank deposit wire from distributor.
[3]	Broken Core Runs	Sizes 39–41 depleted	Prioritize injection molding and assembly lines for depleted Paris points.
[4]	Outbox Backlog	Unsynced IndexedDB mutations	Verify factory Wi-Fi gateway and restore network synchronization.

Chapter 10: HR Management, Advance Ledger & Worker Payroll

This chapter introduces **Gita (HR Officer & Timekeeper)** and explains how LIVO Footwear ERP manages 50+ staff across two shifts with airtight cash advance recovery and statutory overtime math.

SCREEN 14: HR Management Directory & Advance Ledger (/hr)

Callouts: [1] Add Worker [2] Pay Type Badge [3] Active Switch [4] Advance Due [5] TWH / OT [6] Settle Payroll

CALLOUT	CONTROL ELEMENT	FUNCTIONAL PURPOSE	OPERATOR ACTION (GITA'S SOP)
[1]	+ Add Worker Modal	Registers new assembly personnel.	Enter unique Worker Code (EMP-XXX), Name, Join Date, Pay Type (SALARY vs WAGE), and Base Rate.
[2]	Worker Pay Type Badge	Distinguishes salaried and wage staff.	Blue SALARY badge: fixed monthly pay. Amber WAGE badge: calculated from logged working hours.
[3]	Active / Inactive Switch	Toggles worker deployment status.	Toggle Inactive when worker takes leave or resigns to exclude from active shift logs.
[4]	Advance (पेशकी) Balance	Real-time outstanding cash advance ($\sum$ Issued - $\sum$ Recovered).	Click + Advance to disburse cash; system prevents advances exceeding monthly base earnings.
[5]	Hours & Overtime Tally	Monthly Total Working Hours (TWH) and Overtime (OT).	Logs regular hours and overtime; system automatically calculates statutory \$1.5 times\$ overtime rate.
[6]	Settle Monthly Payroll	Computes net salary and settles advance.	Auto-deducts outstanding advance from gross earnings: $\text{Net Payout} = \text{Gross} - \text{Advance}$.

Gita's Standard Operating Procedure: Monthly Payroll Finalization

1. Log mid-month cash advances via + Advance as cash is disbursed from the factory safe.
2. At month-end, click Log Hours and enter Total Working Hours (e.g. 208 hrs) and Overtime (e.g. 24 hrs).
3. Click Settle Payroll: Gross pay is computed with $1.5 \times \text{OT}$, previous advances are deducted to the exact paisa, and net disbursement vouchers are printed.

Chapter 11: Product Media Gallery & Wholesale Line Sheets

This chapter explains how **Sita** and commercial wholesale sales representatives upload and distribute high-resolution product photographs to footwear stockists across Nepal.

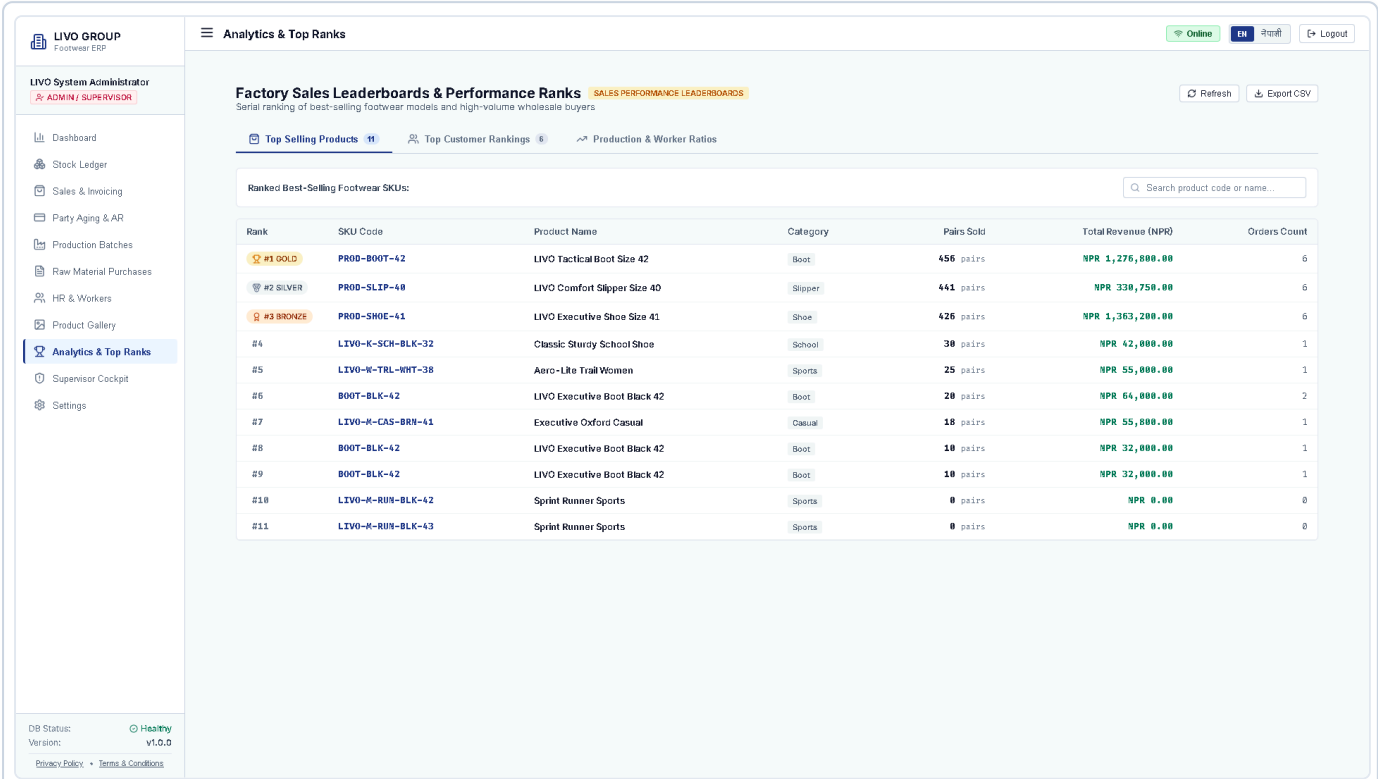

SCREEN 15: Product Media Gallery & Lightbox (/gallery)

Callouts: [1] Upload Image [2] SKU Code Tag [3] Lightbox Card [4] Download Button [5] Catalog Scope

CALLOUT	CONTROL ELEMENT	FUNCTIONAL PURPOSE	OPERATOR ACTION (SITA'S SOP)
[1]	+ Upload Image Modal	Uploads sample footwear photos (≤ 5 MB).	Select target SKU from dropdown, choose JPEG/PNG/WEBP photo, and commit to media library.
[2]	Product Code Tag	Direct linkage to master catalog SKU.	Ensures photos correspond to physical warehouse racks and carton labels (e.g., ART-URBAN-01).
[3]	Lightbox Preview	Full-screen high-contrast inspection.	Click any thumbnail to inspect stitch quality, tread pattern, and colorway before bulk dispatch.
[4]	Download Button	Direct binary asset download.	One-click download saves photo to phone or PC gallery for WhatsApp sharing with distributors.
[5]	Auditor Lockdown	Read-only viewer security.	Under viewer_demo, upload and delete buttons are stripped; auditors cannot alter catalog media.

Chapter 12: Production Ratio Analytics & Efficiency Graphs

This chapter guides **Dambar Shrestha (Factory General Manager)** in evaluating daily line efficiency, labor output ratios, and seasonal manufacturing capacity.

SCREEN 16: Production Ratio Analytics & Dual-Axis Callouts: [1] Timeframe Filter [2] Pairs Produced (Bars) [3] Pairs/Worker Graph (/analytics → Ratios) (Line) [4] Shift Logs [5] Log Daily Shift

CALLOUT	CONTROL ELEMENT	FACTORY METRIC	ANALYTICAL SIGNIFICANCE
[1]	Timeframe Filter	1 Month, 3 Months, 1 Year.	Toggles between short-term shift troubleshooting and multi-quarter seasonal demand planning.
[2]	Pairs Produced (Bars)	Navy vertical bars (Pairs/Day).	Displays gross finished footwear output from daily assembly line runs.
[3]	Pairs / Worker (Line)	Emerald trajectory line (Pairs/Worker).	Core labor productivity metric. A dip below 8.0 pairs/worker indicates line bottlenecks or absenteeism.
[4]	Shift Log Audit Table	Date, workers, hours, pairs, ratios.	Verifies supervisor daily submissions against raw ledger batch additions.
[5]	+ Log Daily Shift Modal	Shift headcount and hours entry.	Supervisors enter daily active headcount and shift hours at the end of each shift.

Factory Productivity Formulae & Benchmarks:

- $\text{Worker Productivity Ratio} = \frac{\text{Total Finished Pairs}}{\text{Active Shift Workers}}$ (Benchmark: ≥ 10.0 pairs/worker/shift)
- $\text{Hourly Output Rate} = \frac{\text{Total Finished Pairs}}{\text{Total Working Hours}}$ (Benchmark: ≥ 40.0 pairs/hour across Line 1 & Line 2)

Chapter 13: Sales & Customer Leaderboards

SCREEN 17: Sales & Customer Leaderboards
(/analytics → Top Products)

Callouts: [1] #1 Gold Badge [2] #2 Silver Badge [3] #3 Bronze Badge [4] Dispatched Pairs [5] Total Revenue

13.1 Top-Selling Footwear Articles (Point 7)

Shoes are ranked automatically by sales volume with commemorative podium badges:

- #1 Gold Podium:** Factory flagship model. Requires continuous raw material safety stock.
- #2 Silver Podium:** High-velocity runner. Buffer minimum 100 cartons in warehouse.
- #3 Bronze Podium:** Core wholesale demand driver across regional dealers.

13.2 Top Customer Rankings & Reliability Scoring (Point 8)

SERIAL RANK	DISTRIBUTOR & PAN	BILLED VOLUME & PAIRS	RELIABILITY SCORE (%) & TERMS
Rank #1	Annapurna Shoes, Pokhara (PAN: 601294821)	Rs. 1,450,000 / 1,200 Pairs	94.2% RELIABILITY • 45-Day Terms
Rank #2	Himalayan Footwear, New Road (PAN: 602819382)	Rs. 980,000 / 800 Pairs	91.0% RELIABILITY • 45-Day Terms
Rank #3	Terai Traders, Biratnagar (PAN: 603928174)	Rs. 620,000 / 520 Pairs	82.5% RELIABILITY • 30-Day Terms

Chapter 14: 10-Second Quick Troubleshooting Guide

Keep this page pinned near factory computer terminals for immediate problem resolution.

WHAT THE SCREEN SHOWS	WHY IT HAPPENED	EXACT FIX (WHAT TO DO)
"504 Gateway Timeout" or screen takes 20 seconds to load on first morning launch	The free backend cloud server on Render goes to sleep after periods of inactivity.	Wait 30 seconds for the cloud server to spin up, then press Ctrl+F5 to reload. Once awake, the system responds instantly.
"Insufficient stock in Size 41" error when trying to dispatch an invoice	Zero-Floor Stockout Protection: You are trying to sell more pairs than physically exist on warehouse shelves.	Open the Stock Card for that SKU. Verify physical pairs on shelf. If finished shoes just arrived from assembly, ensure Ramesh has entered the production batch first.
Customer row has red [HOLD] badge and dispatch is blocked	Credit Limit Lockdown: The customer's unpaid balance exceeds their authorized credit ceiling.	Contact the customer to collect bank payments. Once the accountant logs a payment via + Record Payment, the hold automatically clears.
Status light turns Orange: "अफलाइन (Offline)"	Plant Wi-Fi or router connection temporarily dropped.	Do not panic! Continue entering batches. Data is safely stored in browser memory. When Wi-Fi restores, the badge turns Green automatically.
Printer cuts off the invoice right border or prints blank pages	Printer driver margin settings are incorrect.	In the Chrome Print dialog, set Destination to your printer, Paper Size to A4, Margins to Default, and check Background Graphics.

Appendix: Critical Factory Safety Demonstrations

Demonstration A: The Rapid Keyboard Entry Workflow

Ramesh demonstrates typing finished shoe counts using only **Tab** and the numeric keypad:

Step 1: Select Model & Line

Cursor focuses on model dropdown.

Step 2: Rapid Numeric Entry

Tab through size boxes entering quantities.

Step 3: Live Variance Review

Live strip tallies pairs and shows plan variance.

Step 4: Press **Ctrl+Enter** to Commit

System saves batch, increments number, and snaps cursor to Size 32.

✓ **Batch Saved Successfully!**

Ready for next batch in 0.2s

Demonstration B & C: Zero-Floor & Credit Limit Protection

Demonstration B: Zero-Floor Stockout Protection

Attempting to dispatch 9,999 pairs when stock is insufficient.

System blocks dispatch with clear explanation.

Demonstration C: Credit Limit Lockdown

Customer with unpaid balance placed on credit hold.

Invoicing disabled until account balance cleared.
